Acknowledgment

I would like to express my sincere gratitude to my company supervisor for providing me with the opportunity to complete my internship and for guiding me throughout this period. Their support and professional advice helped me improve my practical knowledge and skills.

I am also thankful to my university teachers for their guidance and support. The concepts learned during my academic studies greatly helped me in understanding and completing my internship tasks successfully.

Lastly, I appreciate everyone who supported me directly or indirectly during this internship.

Introduction

An internship is an essential part of academic learning as it provides practical exposure to the professional environment and helps bridge the gap between theory and real-world application. It enables students to develop technical skills, improve communication abilities, and understand workplace responsibilities.

The main purpose of my internship was to gain hands-on experience in **Web Development**, including both **Front-End and Back-End development**, as well as understanding basic **digital marketing strategies**. During this internship, I worked on designing user-friendly interfaces, managing server-side tasks, and learning how online platforms are promoted and optimized for better reach and engagement.

The duration of my internship was **one month**, during which I actively participated in assigned projects and enhanced my technical and professional skills.

Company Overview

Voxel Solutions is a technology-focused company operating in the field of Technology, Information, and Internet services. Founded in **2024**, the company aims to provide innovative and modern digital solutions to businesses. Despite being a growing organization with a team size of **2–10 employees**, it focuses on delivering quality services through innovation, precision, and modern business practices.

The company specializes in **Software Development, Technology Services, Software Engineering, and Emerging Technologies**. In addition, it offers services such as **Mobile App Development, Content Creation, Video Editing, Graphic Designing, Digital Brand Marketing, Promotions, and E-commerce Solutions**. Through these services, Voxel Solutions helps businesses build strong digital identities and improve their online presence.

Task 01: Company Website Frontend Development

1. Task Title

Company Website Frontend Development using WordPress

2. Objective

The objective of this task was to design and develop the frontend of the company website using WordPress CMS hosted on Hostinger. The goal was to create a responsive, clean, and professional website interface with structured navigation, dropdown menus, contact form integration, and SEO-friendly structure.

3. Platform & Tools Used

- WordPress CMS
 - Hostinger Hosting Platform
 - Astra Theme
 - WPForms Plugin
 - Rank Math SEO Plugin
 - LiteSpeed Cache Plugin
-

4. Task Requirements

The website was required to fulfill the following functional requirements:

- Responsive design (mobile and desktop compatible)
 - Clean and professional user interface
 - Easy navigation with dropdown and sub-dropdown menus
 - Contact form integration
 - SEO-friendly page structure
 - Fast loading performance
-

5. Website Structure

The website included the following main pages:

- Home
- About Us
- Contact Us
- Testimonials
- Categories

Categories Dropdown Structure:

Each category contained sub-pages for Products and Services.

Categories Included:

1. General Order Supplies
 - Products
 - Services
2. Engineering and Automation
 - Products
 - Services
3. Digital Marketing
 - Products
 - Services
4. E-commerce
 - Products
 - Services
5. Satellite Technology
 - Products
 - Services

6. Implementation Process

Step 1: WordPress Setup

- Logged into Hostinger and accessed WordPress dashboard.
- Installed and activated Astra theme for lightweight and professional design.

Step 2: Page Creation

- Created all main pages including Home, About Us, Contact Us, and Testimonials.
- Developed category pages and corresponding Products and Services subpages.

Step 3: Navigation Menu Design

- Created structured navigation menu from Appearance → Menus.
- Implemented dropdown and sub-dropdown hierarchy using drag-and-drop functionality.

Step 4: Contact Form Integration

- Installed WPForms plugin.
- Created a simple contact form.
- Embedded the form into the Contact Us page.

Step 5: SEO Configuration

- Installed Rank Math SEO plugin.
- Configured basic SEO settings for improved search engine visibility.

Step 6: Performance Optimization

- Installed LiteSpeed Cache plugin.
- Optimized website loading speed.

7. Outcome

At the completion of this task:

- A fully functional WordPress frontend was developed.
- Structured dropdown navigation was successfully implemented.
- All required pages were properly designed and organized.
- Contact form was integrated and working.
- Website was responsive across mobile and desktop devices.
- Basic SEO and speed optimization were applied.

8. Skills Learned

- WordPress dashboard management
- Theme customization
- Menu hierarchy creation
- Plugin installation and configuration
- Basic SEO implementation
- Website performance optimization

9. Conclusion

This task provided practical experience in frontend website development using WordPress. It enhanced understanding of website structure, responsive design principles, navigation planning, and basic SEO practices. The completed website frontend is structured, user-friendly, and ready for content population.

APPENDIX

The screenshot displays the WPForms Pro editor interface. At the top, a banner reads "Enable Form Entry Backups for Free | Easily restore your entries when you upgrade to WPForms Pro." Below this, the editor title is "Now editing Contact form". The interface includes a left sidebar with navigation icons for Setup, Fields, Settings, Marketing, and Payments. The main area is divided into two panels: "Add Fields" and "Field Options". The "Add Fields" panel shows "Standard Fields" (Single Line Text, Paragraph Text, Dropdown, Multiple Choice, Checkboxes, Numbers, Name, Email, Number Slider, CAPTCHA) and "Fancy Fields" (Phone, Address). The "Field Options" panel shows the "Contact form" configuration, including fields for Name (First and Last), Email, and a large text area for "Comment or Message". The "Save" button is visible in the top right corner.

The screenshot shows the live website with the "CONTACT US" form. The form is titled "CONTACT US" and includes fields for "Name *" (First and Last), "Email *", and a large text area for "Comment or Message". A green "Submit" button is located at the bottom of the form. The website header shows the URL "voxeipk.com" and various navigation links. The footer area is partially visible, showing "Privacy Policy" and "Terms of Service" links.

Task 02: Creating a Blogging Website Using WordPress

My first wordpress blog:

<http://faraihablogs123.wordpress.com/>

1. Objective

The objective of this task was to get practical experience with WordPress, learn how to create a blogging website from scratch, and understand the basics of website setup, customization, and publishing content.

2. Resources Used

1. **Platform:** [WordPress.com](https://wordpress.com/) (Free Plan)
2. **Browser:** Google Chrome

3. Steps Performed

Step 1: Sign Up on WordPress

- Visited `wordpress.com` and clicked **Start your website**
- Created an account using email, username, and password
- Chose a domain

Step 2: Theme Selection

- Selected a free theme: **Twenty-Twenty Three**
- Clicked **Select** and proceeded to customize the site

Step 3: Website Customization

- Dashboard → **Appearance** → **Customize**
- Added **Site Title:** **Faraiha's blogs**
- Added **Tagline:** "Learning one step at a time"
- Customized colors, fonts, and uploaded a **header image**
- Clicked **Save & Publish**

Step 4: Adding Pages

- Dashboard → **Pages** → **Add New**
- Created main pages: Home, About, Blog, Contact
- Published all pages

Step 5: Creating First Blog Post

- Dashboard → **Posts** → **Add New**
- Post Title: “My First Blog Post”
- Added text and uploaded an image
- Assigned category **Blog**
- Clicked **Publish**

Step 6: Checking Website

- Visited `faraihablogs123.wordpress.com`
- Verified all pages and posts were visible and functional

4. Learning Outcomes

1. Learned how to create a WordPress account and select a domain
2. Learned to choose and customize a theme
3. Learned to add pages, posts
4. Learned to upload images
5. Practiced publishing content and checking website functionality

5. Conclusion

This task provided hands-on experience with WordPress and helped understand the process of creating a blogging website from scratch. By completing this task, I gained confidence in managing a website, customizing its appearance, and publishing posts independently.

learning one step at a time

In a few words, explain what this site is about. Example: "Just another WordPress.com site."

Site Icon

[Change Site Icon](#)

[Remove Site Icon](#)

The Site Icon is what you see in browser tabs, bookmark bars, and within the WordPress mobile apps. It should be square and at least 512 by 512 pixels.

My First Blog Post

Welcome to my blog! 🎉

I'm super excited to start this journey of sharing my thoughts, experiences, and things I love. This is my very first post, and here I want to introduce myself and my vision for this space.

On this blog, you'll find posts about learning tips, tech, lifestyle, personal growth. My goal is to create a place where I can express myself freely and maybe help or inspire others along the way.

Thank you for visiting, and I hope you enjoy reading! Don't forget to **subscribe** and join me on this adventure.

Congrats, your site is live! ×

Now you can head over to your site and share it with the world.
